Pharos Systems' Growth Facilitates Move to Premium Office Space

Rochester, New York (PRWEB)
April 17, 2007 – Pharos Systems International, the leading provider of Enterprise Print Asset Management software solutions, is pleased to announce its move to new corporate headquarters, located at 100 WillowBrook Office Park in Fairport, New York as of Monday, April 23, 2007.

Previously located at 333 West Commercial Street in The Piano

Works Office Building in East Rochester, New York, Pharos Systems' growth and success over the last 15 years necessitated a move to the larger, more expansive space at WillowBrook. The new Pharos Systems headquarters location is owned and leased by Uniland Development Company.

“Uniland is delighted to be part of the expansion and continued growth of a vibrant, industry leader such as Pharos Systems International,” says Nancy R. Dobson, Executive Vice President for Uniland.

Kevin Pickhardt, CEO of Pharos Systems International, says, “Our business has grown tremendously over the past several years and we look forward to consolidating our expansion in a single, larger space. Together with our printer and copier manufacturing partners, we expect to accelerate the development of iMFPs (Integrated MultiFunction Printers). These iMFPs represent a key opportunity for future growth, and the office space at WillowBrook enables us to unite in one building our iMFP team with our worldwide sales force. We are pleased to take this next step in the evolution of our company.”

Pharos Systems will be closed on Friday, April 20th, as it moves to its new location at WillowBrook Office Park. The company will re-open for business on Monday morning, April 23, 2007. Other contact information, including phone numbers and email address will remain the same.

About Pharos Systems International, Inc:

Pharos Systems International, Inc is the recognized industry leader in providing print asset management and cost-recovery solutions to both corporate office and higher education environments. With over a decade of experience, we help customers track, measure, and control their print assets to reduce waste, optimize performance, guide the purchase of new devices, including multifunction printers, and make the most of existing ones. As a result, over 1,500 customers in 23 countries are currently benefiting from optimized printing environments, and are experiencing significant expense reduction.
